Emmanuel Baptist Church Expands

Emmanuel Baptist Church in Winchester, Virginia has added an 11,700 square foot multipurpose building to the existing church on their property. This large addition, designed by Sease and Associates and built by Miller Brothers, doubled the size of the church by adding

a large lobby, full-size gymnasium/multipurpose room, offices, kitchen, storage and an upstairs mezzanine for future expansion. The interior finishes include custom millwork, chandeliers and upgraded finishes in the lobby, and millwork and ceramic tile in the hallways. The structure is a pre-engineered metal building with masonry infill, finished with split-face block and brick, architectural columns and a

standing seam metal roof.

The project was delivered to the church in late August of 2010. Due to careful planning, the only major challenge Miller Brothers had to overcome was just under two months of severe winter weather slowing the building's progress. The church staff is very pleased with the new building and additional space. The building dedication ceremony was held September 26, 2010.

The newly constructed multipurpose building for Emmanuel Baptist Church.

Edlin School Adds Classrooms

The Edlin School, a private K-8 school located in Reston, Virginia, contracted with Miller Brothers to complete their interior renovation project to add five more classrooms in five weeks!

Designed by Architecture, Inc. and

constructed by Miller Brothers, this project was a fusion of existing and new areas configured to meet requirements for more space without adding on to the building. The project included demolition, moving and adding walls and hallways, adding and moving doors, installing windows, renovating two gang bathrooms (with new fixtures, ceramic floors and toilet

compartments), flooring, paint and some exterior work due to the removal/addition of exterior doorways and windows. This project was a success with the seamless transition in finishes and color from the existing to the new classroom space. Miller Brothers delivered the project on time, for the start of the school year, and on budget to the owner.

Edlin School's completed interior renovation for additional classrooms.
